Memo to File  
2612 West College Road

Gary Corson requested this office recheck 2612 West College Road to insure we did not have a problem. The occupant, Betty Cox had smelled the odor during the morning. My inspection did not indicate a problem in the sanitary sewer. No strange odor or L.E.L. was observed in the sewer or house. While I checked the buildings plumbing I can not determine if it is vapor tight unless the structure is smoke tested. If they continue to have a problem this test should be conducted.

3/8/90

I received a call that another problem had been located on the evening of the 7th. A old butane line was discovered and capped on both the inside and outside of the building. The occupant thinks this may have been their problem.

A handwritten signature in cursive script that reads "Stephen Short". The signature is written in dark ink and is positioned above the printed name.

Memo to File  
2612 West College Road

Gene Pabst and Steve Short made an inspection of the Betty Cox home at 2612 West College Road for a suspected gasoline problem in the home. Gary Corson, City Utilities, called March 2, informing this office of their investigation. Mrs Cox smells gas odors at various times. We could not smell any gasoline odors when we were there at about 13:00. We inspected the basement and did observe a sump pump to the street in front of their home. We checked for L.E.L's in the home in manholes in the area. She connects to the start of the line at m.h. 34, (0%), also tested was m.h. 19 (0%) wye map o-6. She was given a business card and told to call if she has further problems.
